I wanted to be a vet and work with animals when I was younger, but now I want to be a sports person. I love sport, especially long-distance running. I practise in PE and in my after-school club. I dream that in the future, I will be a champion runner and travel the world with my team!

In the future, I think I will be an inventor because I'm good at Computer Studies and Science. Last year, I won a competition to design new technology at school. My winning idea was a small robot that helps you with your homework. Imagine that! More time to watch TV!

I live near a rainforest, but I'm worried because some people aren't protecting it. I think that in the future, I will teach children how to look after the plants and animals in the rainforest. We will make our world a better place.

Patrick says:
I will be an Olympic swimmer because I'm the fastest swimmer in my club.

Nikki says:
I think in the future, teachers will be robots! They will have microchips, so they will know EVERYTHING!

Chloe says:
In the future, I think schools will teach new subjects like 'How to look after our planet'.

2 Read again and say *Shelley, Scott or Luis*.
