DIVISION (Using Sharing Method)

Division means to share, to divide, to split to put into equal groups or sets.

Using sharing

12 ÷ 3 = 4

- **Dividend** total number of objects
- **Divisor** number of equal groups
- **Quotient** number in each group

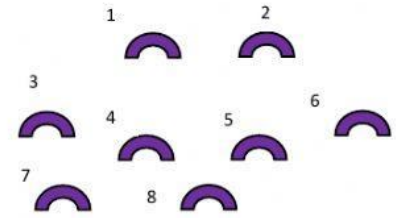
Drag and drop the objects to create groups to help you divide. Use the numbering.

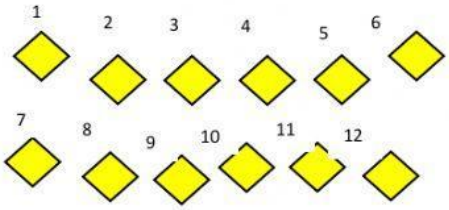
1. 8 ÷ 2 = □

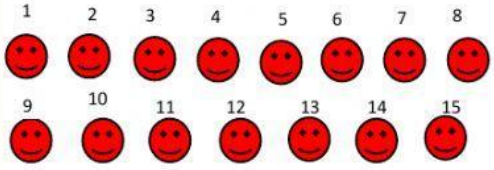
2. 12 ÷ 3 = □

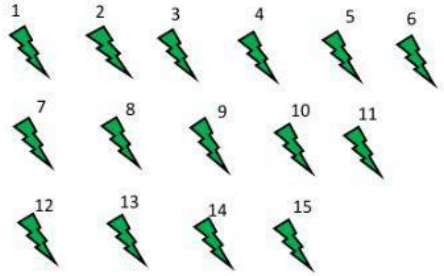
3. 15 ÷ 3 = □

5. 15 ÷ 5 = □





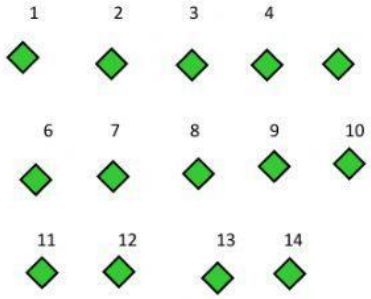




Complete each division number sentence. Use the numbering to drag and drop the objects to show the grouping.

4. James has 14 beads. He shares them equally between his 2 friends. How many beads did each friend get?

☐ ÷ ☐ = ☐



5. Shavel has 12 sweets. She shares them equally among her 4 friends. How many Sweets did each friend get?
