

Name: _____

Rounding numbers to the nearest hundred (100)

Remember the following tips:

- a) Find the rounding place and underline it.
- b) Check the number next door to the right.
- c) If the number next door is:
(0, 1, 2, 3, 4)= we keep the underlined number
(5, 6, 7, 8, 9)= we add one (1) to the underline number
- d) Numbers to the left of the underlined number are written back in their place.
- e) Numbers to the right of the underlined number **change to zero (0)**

Round these numbers to the nearest hundred (100)
