

What if you lived 50 years in the future?

Watch and listen to the video:

1. Listen to “What is life supposed to be like in 50 years’ time?”, and match these numbers and percentages to the ideas from the video.

80-90

Jobs.

Since 1960

Melted Polar ice caps.

800 million

Average life expectancy.

9 billion

Deforested rainforest.

70%

Pyramidal population percentage.

50%

Population on Earth.

Less than 50%

Population living in cities.

2. Now say if these ideas taken from the video are TRUE or FALSE.

Smartphones will be implanted in our vision.	True	False
The percentage of senior citizens will be equal to that of teens.	True	False
Old people will retire earlier.	True	False
There will be less people in the work force.	True	False
Crops will be harder to grow due to global warming.	True	False
Hurricanes will provoke the leaving of coast cities.	True	False
Humans will have travelled to the Moon.	True	False
Alpha Century System will have been colonized by humans.	True	False

3. Order these ideas as they appear in the video (from 1 to 5)
