

Reading Comprehension-6

Colors have been organized into a color wheel. It shows the three primary colors, the three secondary colors, and the six intermediate colors. It helps artists know which colors they want to use together.

The primary colors are red, yellow, and blue. They are the colors that can be mixed together to make different colors. Mixing two primary colors makes a secondary color.

The secondary colors are orange, green, and violet (purple). Orange is made by mixing yellow and red. Green is made by mixing yellow and blue. Violet is made by mixing red and blue.

Intermediate colors can be made by mixing a primary and a secondary color together. Some intermediate colors are blue violet and red orange. Black, white, and gray are special colors. They are called neutral colors.

Color can also change our moods. Bright colors make us feel happy and energetic. Dark colors make us feel calm and sad.

Answer the following questions based on the reading passage.

1. What is a color wheel used for?

2. What are the primary colors?

3. What are the secondary colors?

4. What kinds of colors make us feel calm?
