

A) Choose the correct option

THE EARLY RAILWAY IN BRITAIN

In 1830, there were under 100 miles of public railway in Britain. Yet within 20 years, this (0) had grown to more than 5,000 miles. By the end of the century, almost enough rail track to (1) the world covered this small island, (2) the nature of travel for ever and contributing to the industrial revolution that changed the (3) of history in many parts of the world.

Wherever railways were introduced, economic and social progress quickly (4) In a single day, rail passengers could travel hundreds of miles, (5) previous journey times by huge margins and bringing rapid travel within the (6) of ordinary people. Previously, many people had never ventured (7) the outskirts of their towns and villages. The railway brought them (8) freedom and enlightenment.

In the 19th century, the railway in Britain (9) something more than just the business of carrying goods and passengers. Trains were associated with romance, adventure and, frequently, (10) luxury. The great steam locomotives that thundered across the land were the jet airliners of their (11), carrying passengers in comfort over vast distances in unimaginably short times. But the railways (12) more than revolutionise travel; they also (13) a distinctive and permanent mark on the British landscape. Whole towns and industrial centres (14) up around major rail junctions, monumental bridges and viaducts crossed rivers and valleys and the railway stations themselves became (15) places to spend time between journeys.

D) Fill in the gaps with a suitable form of the word given

Making paper.

It is (1) believed that paper was invented in China. A (2) Chinese court official by the name of Ts'ai Lun first developed a material that was (5) similar to the paper that we use today. The (5) details of the story are unknown, but it is thought that among his ingredients were bits of tree bark, old rags and fishing nets. Ts'ai Lun's inspiration came (5) from making observations of insects that construct a thin-shelled nest from tiny pieces of wood fibre. The first industrial machine for making paper in a continuous roll was perfected in France in 1799. Since then, the world has had an (6) supply of paper. Today paper (7) can offer a wide variety of paper types, from fine white paper to tough brown (8) paper. These days, paper-making is no longer such a time-consuming activity.
