Shanghai Creates Chocolate Wonderland

In 2011 China opened the doors of a unique theme park! Inside Shanghai's World Chocolate Wonderland, everything from the BMW to the sushi, is made of chocolate! To celebrate the opening of this unusual theme park that is situated inside the city's Himalaya Art Museum, organizers held a fashion show where models were wearing chocolate creations. There are a lot of other works of art to admire. That's because the theme park shows the treat (лакомство) in every imaginable way. There are porcelain vases, classical paintings, Louis Vuitton purses, trainers and even Shanghai's Huangpu River, flowing with liquid chocolate. However, the most impressive is the army of China's warriors - scores of soldiers molded (вылепленный) completely from chocolate. Visitors to the park can also try their hand at chocolate making or ask experts to create something original to take home.

This is not the first time China has created this amazing Chocolate Wonderland. In 2010, a similar one in Beijing attracted over 500,000 visitors during the three months it was open. Wonderlands like this don't last long. After about three months people take them down and melt into one big giant bowl of hot chocolate - Yummy!
