# WORKSHEET ON ELECTRICITY (Components of a switch)

NAME \_\_\_\_\_

DATE \_\_\_\_\_

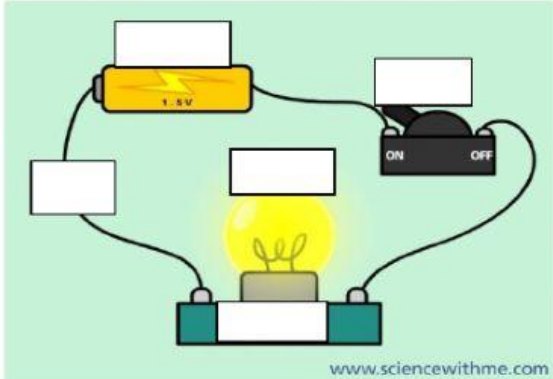

SUBJECT: SCIENCE

CLASS: YEAR 3 EMERALD \_\_\_\_\_

**INSTRUCTION:** Match the words with the right definition.

Meaning	Components
A device that produces light from electricity is called a	<b>Switch</b>
A flexible strand of metal or thin strips of insulated copper that conducts the electric current, allowing it to pass through like a pathway, makes up the circuit is known as	<b>Cell /battery/source</b>
A a device used to power electrical circuits or gives the circuit the required electrical energy is called a	<b>Connecting Wires</b>
A device that turns electric current on and off, closes and opens a circuit is known as	<b>Light Bulb / load</b>

**A simple circuit: Show by dragging the name of the component correctly.**

Bulb holder

Wire

Bulb

Cell/battery

Switch
