

Classify Minerals Assessment

What are the 3 ways that minerals are formed?
Check all that apply.

Metamorphism

Falling to Earth from outer space

Lava melting and cooling

Solutions

DIRECTIONS: Read the description and choose the answer that best shows how the mineral described was most likely formed.

1.

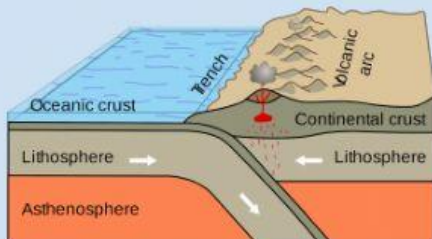

Found at the bottom of a dry lake bed

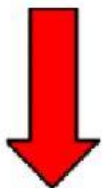

2. Found near a volcano

3.

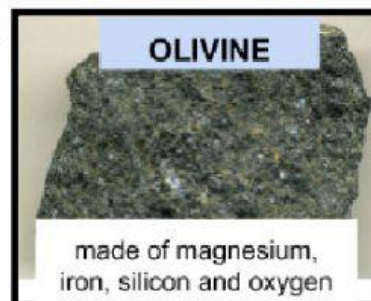

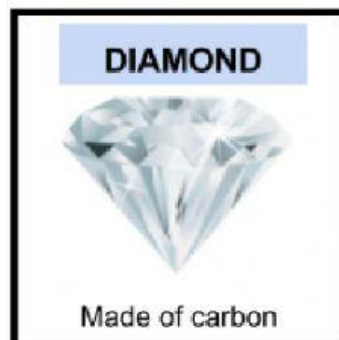

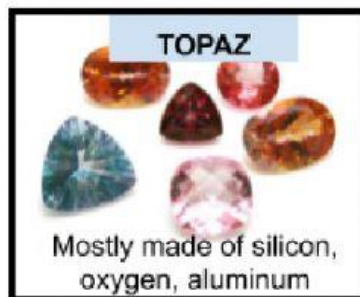

Found below the Earth's surface where the temperatures and pressure are high
