

Escalator and Lift safety

Click [here](#) and watch to learn elevator (lift) safety. Then, fill in the blanks in the table.

Do not push or rush into elevator, you may get hurt if you do so.

Do not open the door by putting foot or hand.

The lift may be malfunctioning due to overload. Wait for next ride.

	Main ideas	Supporting ideas
	Stand in queue and wait till everyone get off the elevator, then enter the elevator.	
	Do not enter the elevator if it is full.	
	Always press the button to open the door.	

Click and watch to learn escalator safety. Then, fill in the blanks in the table.

Feet are within the yellow lines of an escalator step.

Children should be accompanied by an adult when using an escalator. Parents should hold their hands firmly and hold onto the handrails.

	Main ideas	Supporting ideas
	<p>Never bring strollers, walkers or wheelchair on an escalator.</p>	<p>A misstep could cause accident.</p>
		<p>Avoid standing too close to the edges. Loose clothing can get caught in between the steps.</p>
	<p>Pay close attention and attend small children.</p>
