ROYAL AIR FORCE AIR RAIDS

Airplanes were still new inventions in 1914, and they were used mainly for ....., to find out what the enemy was doing. These light open planes could fly over enemy lines to take ..... Soon, new developments took place and ..... planes were designed and built. Planes were designed to carry small ....., that could do little damage.

There were ..... heroes, such as Albert Ball, Billy Bishop and Baron von Richthofen, who become famous for the number of planes they shot down. The Royal Flying Corps became the .....

Some airships, such as the ....., could fly faster and carry more arms than airplanes. By the end of the war, ... raided London.

During the war, the size, ... and speed of aircraft improved. Although the number of people killed in ..... was not large, it became obvious that in the future, war civilians would suffer even if they were miles away from the fighting itself.
