

1. Compta quants cubs s'han emprat per construir aquestes figures:

Hi ha

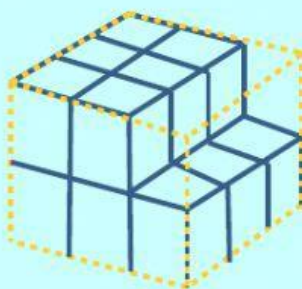

cubs

Hi ha

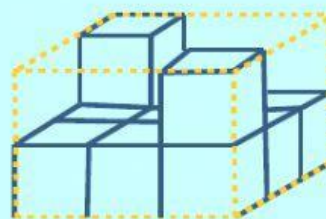

cubs

2. Pensa quants cubs falten a cada fibura per tenir la capsa completa:

Hi falten

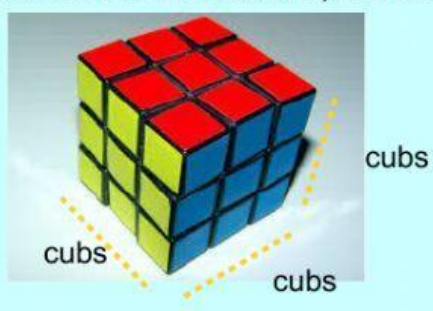

cubs

Hi falten

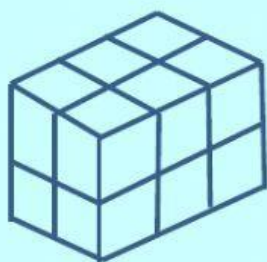

cubs

3. Quants cubs hi ha en aquesta figura? Calcula'n el total fent un càlcul (multiplica les tres dimensions), sense comptar-los d'un en un:

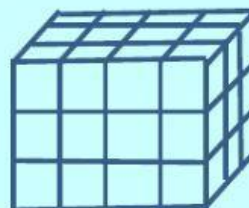

$$\text{cubs} \times \text{cubs} \times \text{cubs} = \text{cubs}$$

4. Fes el mateix que a l'exercici 3. Escribe el total de cubs fent càlculs:

Hi ha cubs

Hi ha cubs
