

## Life After Quarantine

Part 1. Select the correct word for the space. Read the words before you listen.

*hoped, answers, ends, started, said, normal, learn, asked*

A survey in the United Kingdom \_\_\_\_\_ people about life after quarantine. A market research company asked 4,343 people about life after the quarantine \_\_\_\_\_. The company said they were surprised by the people's \_\_\_\_\_. Only nine percent of Britons want life to return to \_\_\_\_\_ after the coronavirus outbreak is over. This means 91 percent want life to be different to how it was before the pandemic \_\_\_\_\_. Over half of people (54%) said they \_\_\_\_\_ to change the way they live. Lead researcher Professor Tom MacMillan \_\_\_\_\_: "This data shows there is a real desire for change, and for the nation to \_\_\_\_\_ from this crisis."

Part II. Select the correct word for the space. Read the words before you listen.

*stronger, trying, cleaner, work, changes, food, talk, use, buying*

Most of the people in the survey said they noticed big \_\_\_\_\_ because of the quarantine. Just over half (51%) have noticed \_\_\_\_\_ air outdoors, and 27 percent have seen more wildlife in the past month. This may encourage people to \_\_\_\_\_ cars less when the quarantine ends. Maybe more people will \_\_\_\_\_ from home. Many people (42%) said they value \_\_\_\_\_ more, and 38 percent said they are now cooking at home and not \_\_\_\_\_ prepared meals. Another change could be a \_\_\_\_\_ sense of community. Over 40 percent of people said they \_\_\_\_\_ to their neighbors more often. Professor MacMillan said: "People are \_\_\_\_\_ new things and noticing differences at home, in their work and in communities."
