

1. Encircle True or False for each of the following statement.

(i) Sqaure has all four sides congruent.

T	F
---	---

(ii) The area of square is 2cm^2 , if its length of each sdie is 1cm.

T	F
---	---

(iii) If area of rectangle is 20cm^2 , its length is 10cm then its width is 2cm.

T	F
---	---

(iv) Each interior angle of rectangle is 360° .

T	F
---	---

(v) If perimeter of square = 24m, its length is 4m.

T	F
---	---

(vi) If product of length & width of rectangle is 35cm^2 , its area is 35cm^2 .

T	F
---	---

(vii) If product of side of side of square with itsef gives 49cm^2 , Its area is $49\text{cm}^2 \div 4$.

T	F
---	---

(viii) If length of rectangle = 4m ,width = 6m , its perimeter is 10m.

T	F
---	---

(ix) If length of each side of a square field is 10m, Ali took one round around it , distance covered by Ali is 20m.

T	F
---	---

(x) If $2(l + w)$ of rectangle = 20cm , sum of length & width of rectangle is 40 cm.

T	F
---	---
