

ECUACIONES

1. En cada caso HALLA el valor de "x":

$x + 3 = 7$ $x = 7 - 3$ $x = 4$	$x + 2 = 10$ $\square = \square \square \square$ $\square = \square$	$x + 1 = 24$ $\square = \square \square \square$ $\square = \square$
$x + 0 = 18$ $\square = \square \square \square$ $\square = \square$	$x + 5 = 19$ $\square = \square \square \square$ $\square = \square$	$x + 13 = 31$ $\square = \square \square \square$ $\square = \square$
$x - 3 = 8$ $x = 8 + 3$ $x = 11$	$x - 5 = 10$ $\square = \square \square \square$ $\square = \square$	$x - 4 = 1$ $\square = \square \square \square$ $\square = \square$
$x - 9 = 21$ $\square = \square \square \square$ $\square = \square$	$x - 13 = 31$ $\square = \square \square \square$ $\square = \square$	$x - 4 = 72$ $\square = \square \square \square$ $\square = \square$
