Hai Class!

Today we are going to learn about how the Earth can spins and leads to day and night!

If you know, the sun appears from the **East (Timur)**

And the sun will set in the **West (Barat)**

At day, you can see many objects that seem in the sky looks like the sun, the rainbow etc.

At night, there are also objects that appear in the sky such as the moon, fireworks etc.

Now, please pay attention to this video bellow.

SD Tumbuh – Jogja Educational Spirit

Kelas : Lower A

Inquiry : Who we are

Mata Pelajaran : CIPP SCIENCE

Teacher's feedback:

Nama : _____

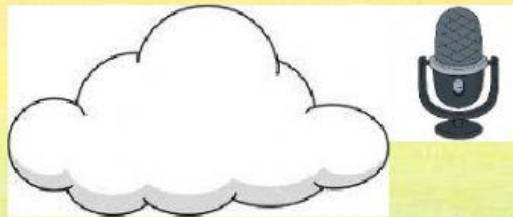

Tanggal : _____
