

SCIENCE EXAM EIGHTH GRADE

III PARTIAL

INSTRUCTIONS: Choose the correct answer and circle it.

1. What is the atmosphere?
 - a. is a gaseous mantle that envelops the Earth
 - b. is a liquid layer of Earth
 - c. is a solid layer of Earth
2. Are layers of the atmosphere:
 - a. Hydrosphere, lithosphere
 - b. Exosphere, thermosphere
 - c. Mantle, core
3. What is exosphere?
 - a. is the most distant layer of the Earth
 - b. is the closest layer of Earth
 - c. is the biggest layer of Earth
4. What is thermosphere?
 - a. is the most distant layer of the atmosphere
 - b. is the most extensive layer of the atmosphere
 - c. is the closest layer of the atmosphere
5. What is mesosphere?
 - a. is the coldest layer of the atmosphere
 - b. is the hottest layer of the atmosphere
 - c. is the driest layer of the atmosphere
6. What is air?
 - a. is a mixture of elements
 - b. is a mixture of hydrogen and helium
 - c. is a mixture of gases
7. Are the main gases of air:
 - a. nitrogen, oxygen, carbon dioxide
 - b. hydrogen, helium, sodium
 - c. phosphorus, fluorine, chlorine
8. What is meteorology?
 - a. is the science that studies air
 - b. is the science that studies climate
 - c. is the science that studies weather

9. How is the climate of Honduras?
 - a. Tropical
 - b. Rainy
 - c. Dry
10. Are natural disaster that affect Honduras:
 - a. Laura, Matthew
 - b. Fifi, Mitch
 - c. Diego, Dana
11. Are meteorological instruments to measure weather:
 - a. hygrometer, anemometer
 - b. barometer, thermometer
 - c. mercury, flow meter
12. Is the name of the organization that coordinate measures to protect life in Honduras:
 - a. DPI
 - b. NAPO
 - c. COPECO
