**SUBJECT:** BASIC SCIENCE

**CLASS:** YEAR 3 EMERALD

**INSTRUCTION:** Click on the right answer to the questions below.

1. Seeds are the small parts produced by plants from which new \_\_\_\_\_ grow.
  - a) Plants
  - b) Leaf
  - c) Root
2. There are \_\_\_\_\_ primary parts of a seed.
  - a) 2
  - b) 4
  - c) 3
3. The following are monocotyledonous seeds **EXCEPT**.
  - a) Bean
  - b) Wheat
  - c) Rice
4. There are \_\_\_\_\_ major types of seeds.
  - a) 2
  - b) 4
  - c) 3
5. What part of the seed is also known a baby plant?
  - a) Testa
  - b) Embryo
  - c) Endosperm
6. Seed coat is also known as \_\_\_\_\_.
  - a) Testa
  - b) Embryo
  - c) Endosperm
7. Is a seed a living or a non-living thing?
  - a) I am sure it's a living thing.
  - b) I am not sure its a living thing.
  - c) I am sure it's not a living thing.
8. When the seed begins to grow, one part of the embryo becomes the plant (\_\_\_\_\_) while the other part becomes the root of the plant (\_\_\_\_\_)
  - a) Plumule/radicle
  - b) Radicle/plumule
  - c) Plumer/radius
9. The biggest seed in the world is gotten from which tree?
  - a) Palm tree

b) Cashew tree

c) mango tree

**10.** The smallest seeds in the world is called?

a) Benniseed

b) Pepper seed

c) Mustard seed
