

Use your model to complete the fractions equivalent to each given.

$$1.) \quad \frac{1}{2} = \frac{\quad}{4} = \frac{\quad}{8} = \frac{\quad}{12} = \frac{\quad}{16}$$

$$2.) \quad \frac{2}{3} = \frac{\quad}{6} = \frac{\quad}{9} = \frac{\quad}{12} = \frac{\quad}{21}$$

$$3.) \quad \frac{5}{7} = \frac{\quad}{14} = \frac{\quad}{21} = \frac{\quad}{28} = \frac{\quad}{35}$$
