Grade 2 Module 1 Lessons 1-4
Created By Kathleen Walke

---

1 Solve each sum or difference and match the correct answer.

$19 + 3$

$5 + 11$

$15 - 4$

$3 - 1$

DRAG & DROP THE ANSWER

9

2

16

11

22

---

2 Enter the number that makes the sum true.

$6 +$ ⬚ $= 9$

3 Solve the subtraction problem.

$9 - 5$

- (A) 4
- (B) 6
- (C) 5
- (D) 3

4 Find the number that makes the sum on the left side of the equation the same as the sum on the right side of the equation.

$44 + 5 =$ [   ] $+3$

5 Select all of the following that are the same as 12.

- [A] $7 + 5$
- [B] $14 - 3$
- [C] $8 + 4$
- [D] $16 - 4$
