

Grade 4 Module 1 Lessons 1-4

Created By Kathleen Walke

1 The value of the digit 5 in 24, 513 is how many times the value of the digit 5 in 357?

- (A) 10
- (B) 100
- (C) 1,000
- (D) 10,000

2 Part A

Solve the multiplication problems to discover a pattern.

Enter your answers in the boxes.

$$1 \times 6 = 6$$

$$10 \times 6 = \boxed{}$$

$$100 \times 6 = \boxed{}$$

$$1,000 \times 6 = \boxed{}$$

Part B

Use the pattern to help you solve this problem.

Enter your answer on the box.

$$100,000 \times 6 = \boxed{}$$

3

Which symbol belongs in the box to make a true comparison? (use $<$, $=$, or $>$).

Write your answer in the box.

$$2,000 + 300 + 10 + 5$$

a

$$3,000 + 200 + 30 + 7$$

a

<

>

=

4

Complete the sentence using place value.

2 hundred = tens

5

Which number sentence correctly compares two numbers?

- (A) forty-six thousand three hundred fifteen $<$ 46,350
- (B) $29,073 = 20,000 + 9,000 + 700 + 3$
- (C) $10,000 + 6,000 + 400 >$ sixteen thousand four hundred ten
- (D) $86,502 = 80,000 + 6,000 + 500 + 20$
