

## Size of computer networks

Computer networks have different sizes and shapes.

|                  |                                                  |
|------------------|--------------------------------------------------|
| LAN              | a group of connected computers and other devices |
| Internet         | Home , School                                    |
| Example of WAN   | wide area network                                |
| Example of LAN   | a global network of devices                      |
| Computer network | local area network                               |
| WAN              | the whole UAE                                    |
