8 Complete the text with one word in each space.

Eco Homes

We all know that we waste too 1) much energy at home and we should cut down. But the fact is that most of the homes we live in just aren't energy-efficient 2) _____. They use 3) _____ much energy to keep them warm in winter and cool in summer, and that's without all the lighting and modern electrical appliances we all love. Now, more and more people are looking for an eco-home – a home that is comfortable 4) _____ to live in all year round, without using 5) _____ a lot of energy that it damages the environment. This house has 6) _____ solar panels on the roof 7) _____ generate all its own electricity. In fact, last year it generated 8) _____ much electricity that it sold some to the main electricity supplier. Owner Adam Trilby is delighted with his eco-house. 'It's good to know we're helping the environment,' he says, 'and it's 9) _____ a cheap house to live in that we now have more money to spend on other things.'
