

Definitions bingo – geographical features

a) Drag the geographical features next to their definitions.

archipelago		It's an area of land surrounded by water on all sides.
basin		It's a group of islands.
bay		It's a part of the coast which goes into the sea.
beach		It's a small area of the sea partially enclosed by land.
cape		It's a large area of the sea partially enclosed by land.
cliff		It's a low, flat coastal area covered in sand.
glacier		It's a very steep or vertical rock formation on a high coastal area.
gulf		It's an area of land surrounded by water on all sides except one.
island		It's a piece of land that connects a peninsula to a continent.
isthmus		It's a low, flat area of land.
peninsula		It's a natural depression, or low area of land, which can be below sea level.
plain		It's a large, high, flat land area.

plateau

It's a high land with steep sides.

mountain

It's an area of low land between mountains, often with a river flowing along it.

valley

It's a river of ice that moves slowly down a mountain.

b) Choose 9 words and drag them into the grid to play the game.

archipelago	cliff	peninsula
basin	glacier	plain
bay	gulf	plateau
beach	isthmus	valley
cape	mountain	island

c) Listen to the clues in the order indicated by the numbers (no cheating!)
Drag the words back to the red boxes when you hear them.

1	2	3	4	5
6	7	8	9	10
11	12	13	14	15

d) If you run out of clues and you still have some words left in the grid, you have missed some words! You lose!

If you have dragged all the words back to the red box before you have heard all the clues, you win!!

Of course, if you are playing with a friend (you can just copy the grid with your words on a piece of paper), the first person to complete his grid is the winner!
