Analytical Exposition Text

A. Choose the correct answer!

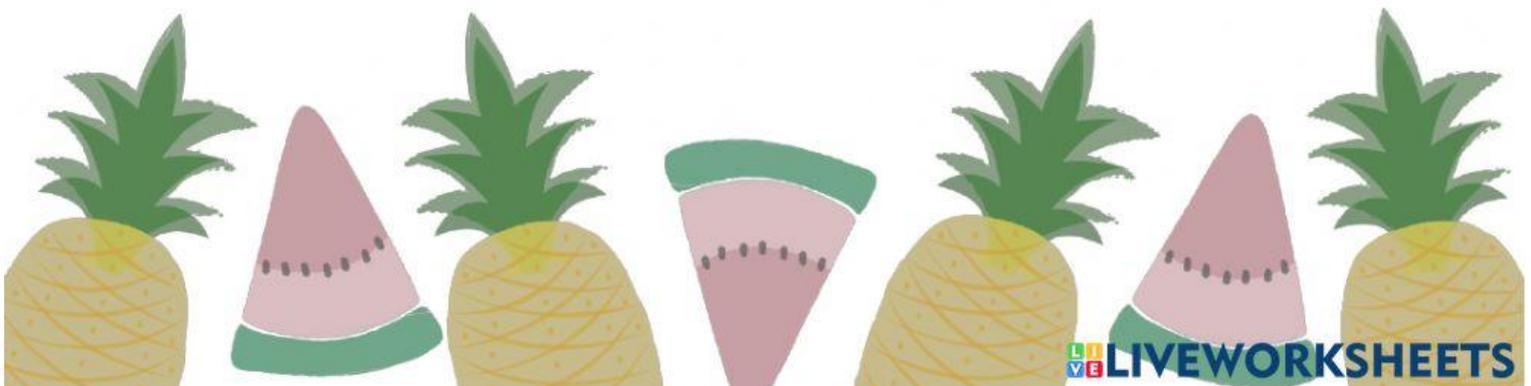

The earth is getting hotter each day. The amount of nature disaster increased a lot. They're actually the effect of Global Warming. We got to find the problem solving immediately. Therefore, we think that RECYCLING is one of the most effective ways to reduce world's temperature. We have several reasons that prove our opinion.

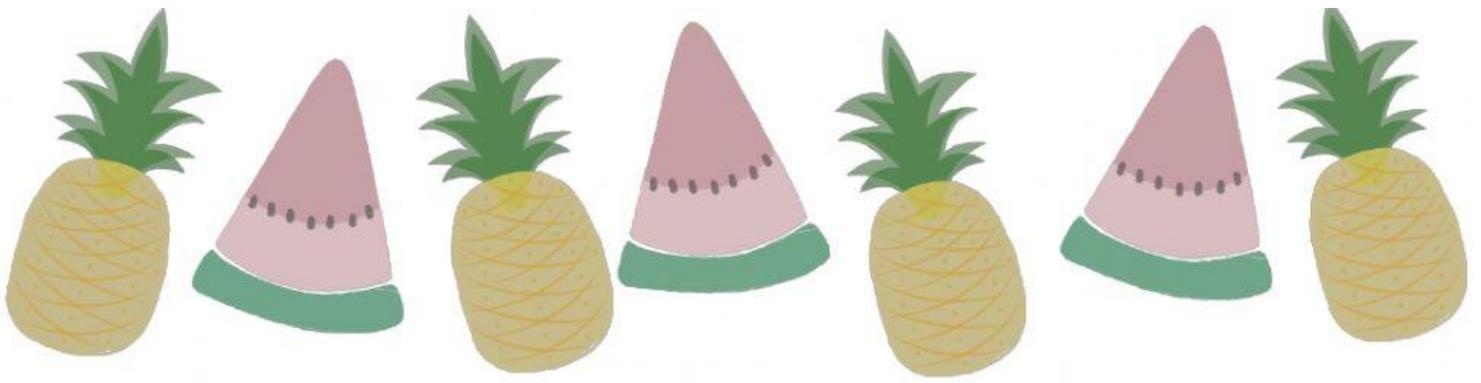

First, recycle is easy to do. We can recycle many useles stuffs around us. For example, unused plastic bottles are able to be tricked as cute lampions. It's very valuable since plastic are toughest material to be destroyed.

Second, recycle doesn't spend much of money. If compared with planting lots of plants, it saved more cost. Because we just need to change rubbish into more useful mean. Perhaps we can turn out a former milk can into a pretty pencil case.

Thirdly, recycle can be done in home everywhere as long as you bring up all needed things for recycling. You only required to be creative and flexible to make trashes as functional goods.

So that, recycling is absolutely an easy-doing way to save our world! Besides, we must be more caring to environment. Don't litter, don't use too much energy (electrical tools), don't be overuse of papers, plastics, and tissues. Be the world's savior!

1. Why does the temperature of the earth increase?

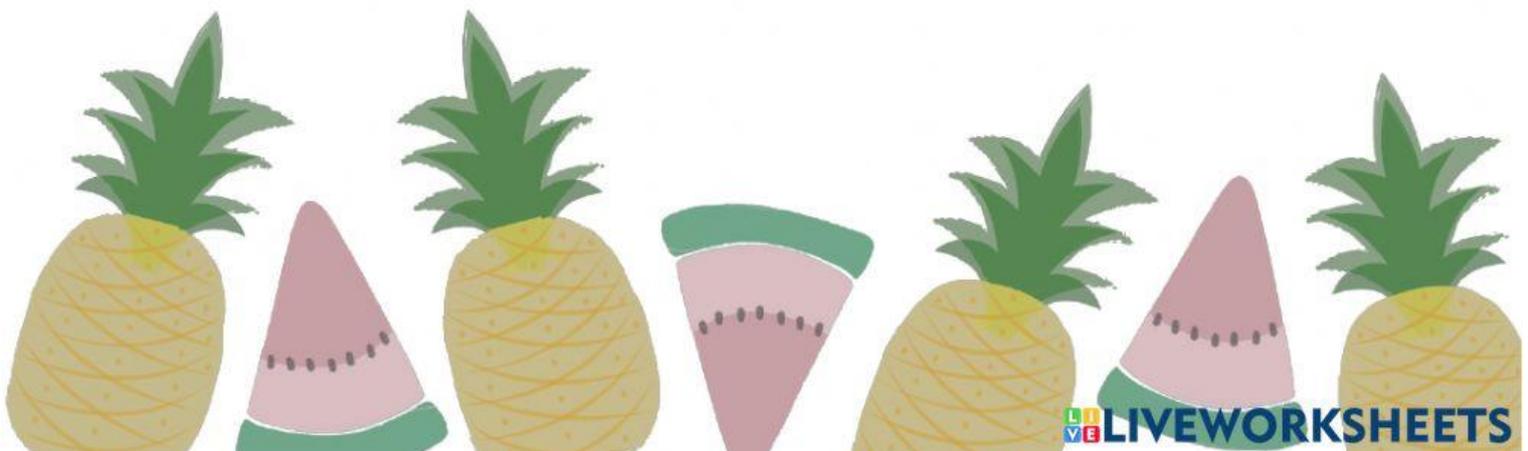

- a. The amount of the useless stuffs around us.
- b. The people find the problem solving immediately
- c. The effect of global warming.
- d. The recycling as the most effective way.

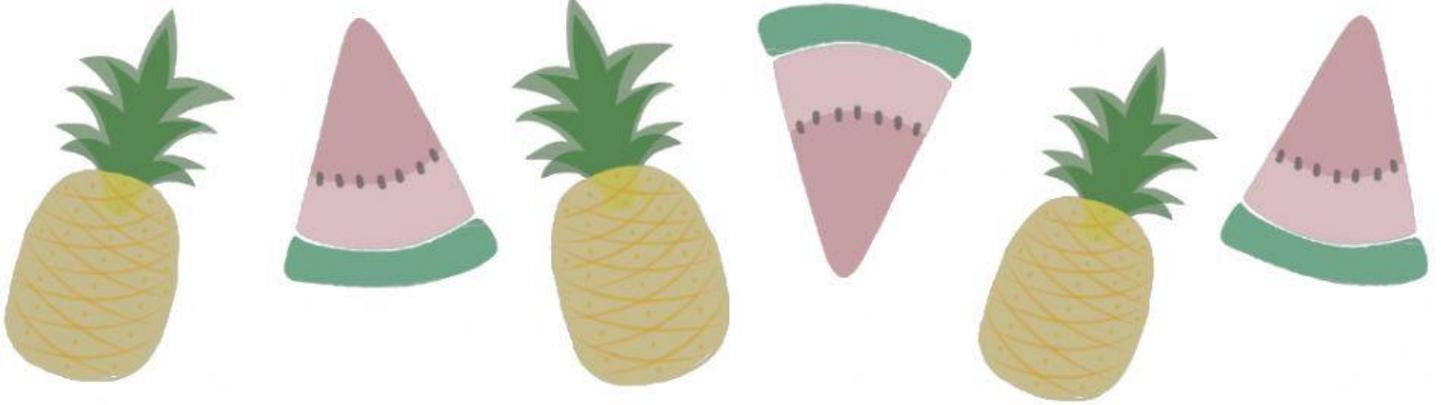

2. What does follow the higher temperature of the earth?

- a. The increasing amount of natural disasters.
- b. The most effective way to reduce the warming.

B. Match the following statements by putting an arrow!

The writer's conclusion

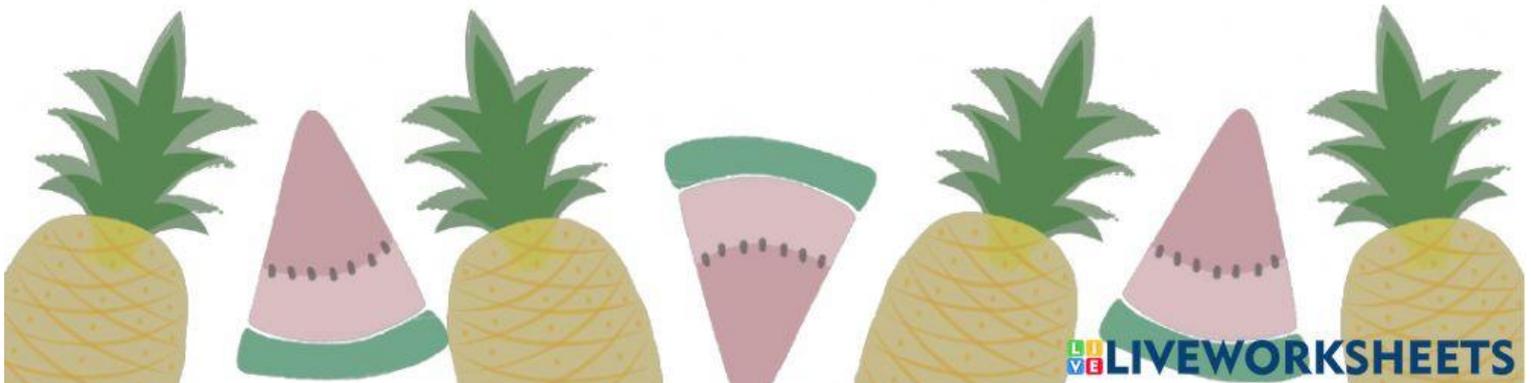

Thesis

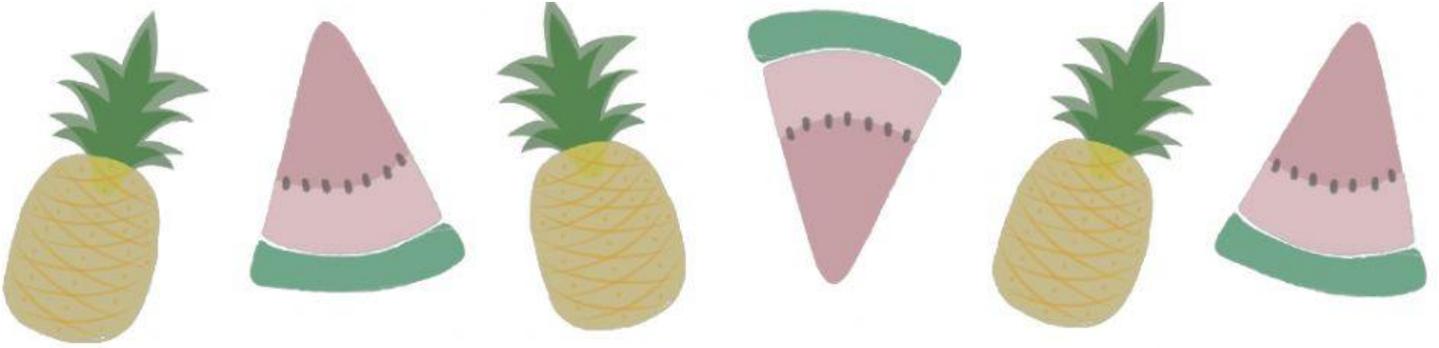

*Evidence and explanation to support
Evidence and explanation to support*

Reiteration

*Introducing the topic which
indicate the writer's point of view*

Arguments

C. Re-arrange the following paragraph into the best Analytical Exposition text by finding its generic structure!

Firstly, cars, as we all know, contribute to most of the pollution in the world. Cars emit a deadly gas that causes illness such as bronchitis, lung cancer, and 'triggers' off asthma. Some of these illnesses are so bad that people can die from them.

Secondly, the city is very busy. Pedestrians wander everywhere and cars commonly hit pedestrians in the city, which causes them to die. Cars today are our roads biggest killers.

Thirdly, cars are very noisy, if you live in the city, you may find it hard to sleep at night, or concentrate on your homework, and especially talk to someone.

In conclusion, cars should be banned from the city for the reasons listed.

Cars should be banned in the city. As we all know, cars create pollution, and causes a lot of road deaths and other accidents.
