$\frac{1}{3} de 21 = \frac{\square}{\square} \times \underline{\hspace{1cm}} = \frac{x}{\square} = \frac{\square}{\square}$
$\frac{3}{5} de 20 = \frac{\square}{\square} \times \underline{\hspace{1cm}} = \frac{x}{\square} = \frac{\square}{\square}$
$\frac{1}{6} de 18 = \frac{\square}{\square} \times \underline{\hspace{1cm}} = \frac{x}{\square} = \frac{\square}{\square}$
$\frac{4}{9} de 36 = \frac{\square}{\square} \times \underline{\hspace{1cm}} = \frac{x}{\square} = \frac{\square}{\square}$
$\frac{2}{5} de 10 = \frac{\square}{\square} \times \underline{\hspace{1cm}} = \frac{x}{\square} = \frac{\square}{\square}$
$\frac{5}{8} de 24 = \frac{\square}{\square} \times \underline{\hspace{1cm}} = \frac{x}{\square} = \frac{\square}{\square}$
$\frac{6}{10} de 60 = \frac{\square}{\square} \times \underline{\hspace{1cm}} = \frac{x}{\square} = \frac{\square}{\square}$
$\frac{7}{8} de 56 = \frac{\square}{\square} \times \underline{\hspace{1cm}} = \frac{x}{\square} = \frac{\square}{\square}$
$\frac{1}{7} de 42 = \frac{\square}{\square} \times \underline{\hspace{1cm}} = \frac{x}{\square} = \frac{\square}{\square}$
$\frac{2}{9} de 81 = \frac{\square}{\square} \times \underline{\hspace{1cm}} = \frac{x}{\square} = \frac{\square}{\square}$
