

Read and complete the sentences.

Genetics

          
DNA is made up of the 4 bases. A gene is a portion of your DNA.

       
Genes can determine your traits. A trait is a characteristic that makes you

       
act and look a certain way. Some traits require many genes. Some traits only

        
require one gene. One different trait can make a change. Genes make us all

 
different.
