1. How do you use computers in your daily life? (3-5 sentences)

2. What are some jobs that would require you to have good computer skills? (3-5 sentences)

- Read the magazine article. Answer the questions.

What is the article about?

What does the article advise readers to do before they apply for a job?

12 Careers in Computing

Are you looking for a job? Then you need to brush up on your **computer literacy** skills. Most jobs require basic computer skills. Even if you're thinking of going into car sales, you'll need to use a computer. Many jobs require even more familiarity. But if you are willing to learn, your odds of getting a job improve.

For example, most **management** and **accounting** positions call for a good working knowledge of computers. If you want to find an **administrative assistant** job, you'll also need some computer skills. You'll be typing up memos, keeping track of appointments, or scanning and e-mailing important documents. Some companies hire **bloggers** to write about their achievements. Similarly, **data entry** is also almost completely computer-based.

If you're interested in **computer science**, consider a job in the **IT** department or **tech support**. Getting a job as a **software engineer** or **programmer** requires you to know a lot about programming languages. **Web developers** also need that knowledge. In addition, **system administrator** jobs require you to know about computer networks.

Computer literacy is very vital for the workplace these days. Before you go looking for a job, make sure you refresh your skills!

1 How do you use computers in your daily life?

2 What are some jobs that would require you to have good computer skills?

- Read the magazine article again. Then, choose the correct answer.

Digital habits across generations

Read an article about how people at different ages use computers and smartphones to practise and improve your reading skills.

Before reading

Do the preparation task first. Then read the text and do the exercises.

Preparation task

Match the definitions (1–8) with the vocabulary (a–h).

Vocabulary

1. to miss out on
2. addiction
3. constantly
4. to be cut off from
5. unlike
6. social media
7. ironically
8. early adopters

Definitions

- a. websites and apps like Facebook, Twitter and Instagram
- b. in a funny or strange way because it's unexpected
- c. different from
- d. to not get the benefits of
- e. needing something too much or in an unhealthy way
- f. people who are the first to buy or use new technology
- g. all the time without a break
- h. to have no access to

Reading text: Digital habits across generations

Today's grandparents are joining their grandchildren on social media, but the different generations' online habits couldn't be more different. The over-55s are joining Facebook in increasing numbers, meaning that they will soon be the site's second biggest user group, with 3.5 million users aged 55–64 and 2.9 million over-65s.

Sheila, aged 59, says, 'I joined to see what my grandchildren are doing, as my daughter posts videos and photos of them. It's a much better way to see what they're doing than waiting for letters and photos in the post. That's how we did it when I was a child, but I think I'm lucky I get to see so much more of their lives than my grandparents did.'

Ironically, Sheila's grandchildren are less likely to use Facebook themselves. Children under 17 are leaving the site – only 2.2 million users are under 17 – but they're not going far from their smartphones. Chloe, aged 15, even sleeps with her phone. 'It's my alarm clock so I have to,' she says. 'I look at it before I go to sleep and as soon as I wake up.'

Unlike her grandmother's generation, Chloe's age group is spending so much time on their phones at home that they are missing out on spending time with their friends in real life. Sheila, on the other hand, has made contact with old friends from school she hasn't heard

from in forty years. 'We use Facebook to arrange to meet all over the country,' she says. 'It's changed my social life completely.'

Teenagers might have their parents to thank for their smartphone and social media addiction as their parents were the early adopters of the smartphone. Peter, 38 and father of two teenagers, reports that he used to be on his phone or laptop constantly. 'I was always connected and I felt like I was always working,' he says. 'How could I tell my kids to get off their phones if I was always in front of a screen myself?' So, in the evenings and at weekends, he takes his SIM card out of his smartphone and puts it into an old-style mobile phone that can only make calls and send text messages. 'I'm not completely cut off from the world in case of emergencies, but the important thing is I'm setting a better example to my kids and spending more quality time with them.'

Is it only a matter of time until the generation above and below Peter catches up with the new trend for a less digital life?

Tasks

Task 1

Are the sentences true or false?

	Answer	
	True	False
1. More people aged 55 or more use Facebook than people aged 65 or more.		
2. Grandparents typically use Facebook less than their grandchildren.	True	False
3. Sheila feels grateful to social media.	True	False
4. Peter found his own smartphone use affected how he felt about how much his children used their phones.	True	False
