

# Geometria Plana

## Área e perímetro

Arraste a fórmula da área e do perímetro das figuras planas abaixo e coloque na figura correspondente.

$$\text{Área} = \frac{b \cdot h}{2}$$

$$\begin{aligned}\text{Área} &= L^2 \\ \text{Perímetro} &= 4L\end{aligned}$$

$$\begin{aligned}\text{Área} &= \frac{D \cdot d}{2} \\ \text{Perímetro} &= 4L\end{aligned}$$

$$\begin{aligned}\text{Área} &= \frac{(B + b) \cdot h}{2} \\ \text{Perímetro} &= B + b + l_1 + l_2\end{aligned}$$

$$\begin{aligned}\text{Área} &= b \cdot h \\ \text{Perímetro} &= 2(b + h)\end{aligned}$$

$$\begin{aligned}\text{Área} &= \pi r^2 \\ \text{Perímetro} &= 2\pi r\end{aligned}$$
