### **Population Density Calculation**

**Instructions:** Calculate the population density in these examples. All steps/working must be shown. The formula needs to be inserted under each work area.

<b>Population</b>	<b>Area</b>	<b>Population Density</b>
1. 50,000	100 sq km	
2. 200,000	2,500 sq km	
3. 82,100	148 sq km	

Steps/working:

1.

2.

3.
