VI. READING (0.25 point/correct answer)

Questions 23 – 30: Read the passage and answer the questions that follow.

Ecotourism aims to reduce the impact that tourism has on naturally beautiful environments. This type of tourism is very fashionable today and you can apply the principles of ecotourism wherever you go for your holiday. Just remember these basic rules.

- Be prepared. Learn about the place that you're going to visit. Find out about its culture and history. Learn a little of the native language, at least basics like "Please", "Thank you", and "Good Morning". Think of your holiday as an opportunity to learn something.
- Have respect for local culture. Wear clothes that will not offend people. Always ask permission before you take a photograph. Remember that you are a visitor.
- Don't waste resources. If the area doesn't have much water, don't take two showers every day.
- Remember the phrase "Leave nothing behind you except footprints and take nothing away except photographs." Take as much care of the places that you visit as you take of your own home. Don't buy souvenirs made from endangered animals or plants.
- Walk or use other non-polluting forms of transport whenever you can.
- Be flexible and keep a sense of humour when things go wrong.
- Stay in local hotels and eat in local restaurants. Buy local products whenever possible and pay a fair price for what you buy.

Choose your holiday carefully. You don't have to fly to exotic locations for your "eco" holiday. There are probably places of natural beauty and interest in your own country that you've never visited.
