

To conclude, I think that my school has an excellent website. 

In addition, with just a click you can see the different sections of the school: elementary school, junior high, and high school. Another interesting feature is that you can read and learn the lyrics of the school anthem. You can also translate it into different languages like Spanish, German, or English. One of the disadvantages is that some tabs are not ready yet. Another downside is that there is a lot of advertising on this website, but you can pretend not to see it. You should check it out! 

One of my favorite websites is my school's website. I like it because you can easily navigate and find many photographs and the most important information about our school. 

First, you see the homepage with the school logo and some links. There you can watch videos of the school events, for example, the school festival, Christmas or Carnival celebrations, and sports competitions. The best part of our school website is the gallery with lots of pictures of the school's cheerleaders, the different club members, former students, etc.
