

## SCIENCE

Third Grade

CP Weeks 35, 36, and 37

Total Points: 15

Name: \_\_\_\_\_

Date: Tuesday, Oct., 20th, 2020

### I. EARTH AND MOON INTERACTING

**A) Match the terms from the left with the corresponding description on the right.**

- |                  |   |   |
|------------------|---|---|
| 1. lunar cycle   | ◆ | ◆ when Earth blocks sunlight from reaching moon |
| 2. solar eclipse | ◆ | ◆ the pattern the moon follows every 29 days    |
| 3. moon phases   | ◆ | ◆ when the moon's shadow falls on Earth         |
| 4. lunar eclipse | ◆ | ◆ the different "moon shapes" we see            |

**B) Complete the following phrases by dragging the correct term.**

solar system

planet

orbit

star

constellations

1. Groups of stars that appear to form different shapes are known as \_\_\_\_\_
2. A large body of rock and gases is known as \_\_\_\_\_
3. The sun, the planets, and small objects make up the \_\_\_\_\_
4. A path in which each planet revolves is known as \_\_\_\_\_
5. A hot ball of glowing gas that gives off energy is known as \_\_\_\_\_

**C) Choose the correct option.**

1. The planets closest to the sun are called:

- a) outer planets                      b) hottest planets                      c) inner planets

2. The planets farthest from the sun are called:

- a) coldest planets                      b) outer planets                      c) inner planets

## II. MATTER

**A) Match the terms on the left with the correct description on the right.**

- |            |   |   |
|------------|---|---|
| 1. matter  | ◆ | ◆ the amount of matter in something         |
| 2. volume  | ◆ | ◆ the mass of matter compared to its volume |
| 3. mass    | ◆ | ◆ anything that takes up space              |
| 4. density | ◆ | ◆ the amount of space matter takes up       |
