

## Practice It

4. Partition 8 counters one at a time to find the number of counters in each group. Draw the counters.

There are \_\_\_\_\_ counters in each group;  $8 \div 2 = \underline{\hspace{2cm}}$ .

5. Circle equal groups of 5 to find the number of equal groups.

There are \_\_\_\_\_ equal groups;  $15 \div \underline{\hspace{2cm}} = 5$ .

6. **Algebra** Use counters to find each unknown.

Number of Counters	Number of Equal Groups	Number in Each Group	Division Sentence
9	■	3	$9 \div \blacksquare = 3$
14	2	?	$14 \div 2 = ?$
15	■	5	$15 \div \blacksquare = 5$
6	?	3	$6 \div ? = 3$

7. Choose one division sentence from Exercise 6. Write and solve a real-world problem for that number sentence.
