

Cube Roots and Prime Factorization

Use prime factors to find the cube roots for the following numbers. The first one is done for you to follow:

$$\begin{aligned} 1. \quad & \sqrt[3]{27} \\ & (3 \times 3 \times 3) \\ & = 3 \end{aligned}$$

$$2. \quad \sqrt[3]{64}$$

=

$$3. \quad \sqrt[3]{125}$$

=

$$4. \quad \sqrt[3]{216}$$

=

$$5. \quad \sqrt[3]{343}$$

=

$$6. \quad \sqrt[3]{512}$$

=

$$7. \quad \sqrt[3]{1000}$$

=
