Identify Proportional Graphs

If a graph is proportional two things must be true:

#1 – the graph must start at or go through the **origin (0,0)**

#2 – the graph must be a straight line.

Examples:

Directions: For each graph click on the box in front of “YES” if is proportional or “NO” if it is not.

1. ☐ YES or ☐ NO

2. ☐ YES or ☐ NO

3. ☐ YES or ☐ NO

4. ☐ YES or ☐ NO

5. ☐ YES or ☐ NO
