

10

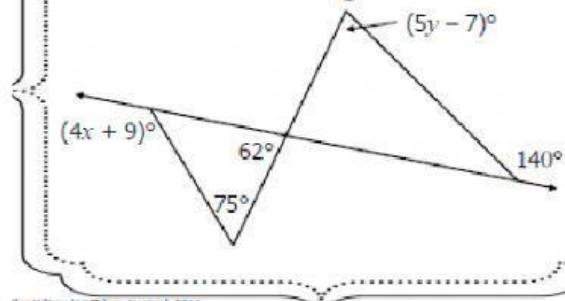

Find the value of x in the triangle below:

10. $x = \underline{\hspace{2cm}}$

15

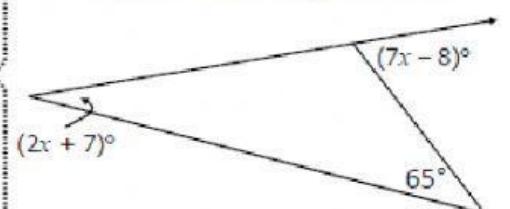

Find the value of x and y in the triangles below:

15. $x = \underline{\hspace{2cm}}$ $y = \underline{\hspace{2cm}}$

12

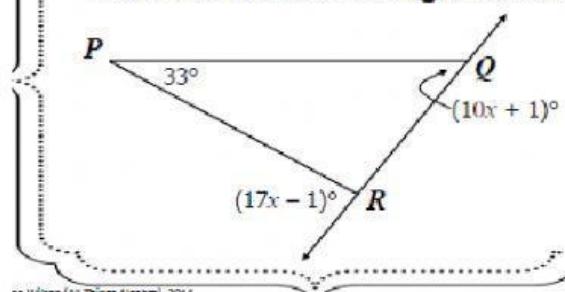

Find the value of x in the triangle below:

12. $x = \underline{\hspace{2cm}}$

16

Find the measures of $\angle PQR$ and $\angle PRQ$ in the triangle below.

16. $x = \underline{\hspace{2cm}}$

$\angle PQR = \underline{\hspace{2cm}}$

$\angle PRQ = \underline{\hspace{2cm}}$
