A. There are a few reasons why one should go to Russia during the winter: it's easier to get tickets to the top ballets and operas, and there are no crowds at other tourist attractions. Those visiting in winter should take along their warmest clothes: It's bitterly cold (Moscow is as far north as southern Alaska) and quite dry. We recommend a long warm coat - the best you can afford.

B. Jamie Oliver is a genius in the world of food. He is one of the world's best-loved television personalities. Jamie has inspired millions of people to spend more time enjoying being in the kitchen - and even start growing their own food! His programs have now been broadcast in over 50 countries, delivering delicious Jamie Oliver recipes to his fans.

C. London is famous for one of the mildest climates in the UK. However, Londoners are used to carrying both an umbrella and sunglasses to be prepared for any situation! The number of rainy days there is fairly consistent throughout the year, with between 11 and 15 rainy days every month. Overall rainfall is highest in November and August and is lowest in March and April.

D. One of the best things about cooking is that there are lots of different things you can do. There are so many different areas you can go into. If you want, you can take up baking and cake decorating. You can try your hand at creating dishes from specific countries; there are so many national cuisines. One thing's for certain; you won't get bored quickly.

E. Russians have always eaten vegetables, such as turnips, cabbage, radish, and cucumbers. Since the 18th century, the potato began to play an ever more important role as one of the most loved ingredients in Russian dishes. At the beginning of the 19th century, Russian cooks started serving food with sauces in the manner that French cuisine had long been famous for.

Задание 19. (in class)

*Imagine that you are preparing a project with your friend. You have found some interesting material or the presentation and you want to read this text to your friend.
You have 1.5 minutes to read the text silently, then be ready to read it out aloud.
You will not have more than 1.5 minutes to read it.*

The ostrich is the bird that lays the smallest egg for its size. Although it is the largest single cell in nature, an ostrich egg is less than 2 per cent of the weight of the mother. A wren's egg, by comparison, is 13 per cent of its weight. The largest egg in comparison with the size of the bird is that of the Little Spotted kiwi. Its egg accounts for 26 per cent of its own weight.

An ostrich egg weighs as much as twenty-four hen's eggs; to soft-boil one takes forty-five minutes. Queen Victoria tucked into one for breakfast and declared it among the best meals she had ever eaten. The largest egg laid by any animal – including the dinosaurs – belonged to the elephant bird of Madagascar, which became extinct in 1700. It was ten times the size of an ostrich egg, nine litres in volume and the equivalent of 180 chicken's eggs.
