

Air pollution

It is an atmospheric phenomenon where dust, smoke, and dry particles in the air obscure the sky's clarity.

Ecosystem

Consists of chemicals or particles in the air that can harm the health of humans, animals, and plants.

Haze

It is a geographic area where plants, animals, and other organisms, as well as weather and landscapes, work together to form a bubble of life.

Pollutants

It is the process of collecting and processing materials that would otherwise be thrown away as trash and turning them into new products.

Wildfire

These are substances that pollute the environment, especially gases from vehicles and poisonous chemicals produced as waste by industrial processes.

Recycling

It is an uncontrolled fire that burns in wild land vegetation, often in rural areas.
