THE ECOSYSTEM SONG

What's a _____? What's a _____?

What's a _____? Can you help me please?

A group of little squirrels, a group of tall pines _____,

a group of wriggly worms each group is a _____.

All the _____ and _____ that live together in one place,

all of them together are a _____.

The place where they live, the amount of light and water,

the soil and the temperature make up their _____.

The habitat where they live and all the living things there,

all of these together make up an _____.

So... A big wide _____, a rainforest and _____

and even a little puddle they're each an ecosystem.
