

The life cycle of a butterfly

1. Look, drag and drop.

Caterpillar

Pupa

Butterfly

Eggs

Emerging From Chrysalis

2. Read and choose the correct answer.

The butterfly starts as a very small egg on a leaf.

The egg opens and a caterpillar comes out.

The caterpillar eats a lot of plants and grows fast.

The caterpillar makes a hard shell around its body called a chrysalis.

Inside the chrysalis, the caterpillar changes into a beautiful butterfly.

Then the butterfly flies away.

a. How does the butterfly start its life?

b. What comes out of the egg?
