### ASTRONAUTS

ACTIVITY 1: Read the text and answer the questions:

1. Who were the astronauts that walked on the moon in July 1969?
2. What was the name of their spaceship?
3. What did the astronauts leave on the Moon's surface?
4. What other planets do you think that humans will visit in the future?

A circular inset photograph showing an astronaut in a white spacesuit standing on the lunar surface. An American flag is planted in the ground to the left of the astronaut. The background is the dark, cratered surface of the Moon.

The first man on the Moon was an American astronaut, Neil Armstrong. He arrived there on 20 July 1969, after a four-day journey through space. 600 million people watched on TV as he and another astronaut, Buzz Aldrin, walked on the Moon's surface. For two hours they collected rocks, did experiments and took photos. They talked to the American President on the phone. Then they left an American flag on the Moon and went back to their spaceship, Apollo 11.

Armstrong never went into space again. But fifty years after his famous journey, there will again be astronauts on the Moon, and on the planet Mars too. Will Neil Armstrong be one of them? Well, he's an old man now. 'I'm ready for another visit,' he jokes, 'but I don't think they'll ask me.'
