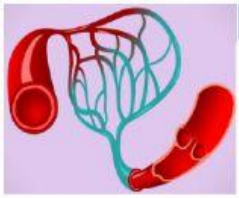
The circulatory system.

_____

...carry oxygen-rich blood away from the heart to your cells. They branch several times, becoming smaller and smaller.



_____

...are small, thin, blood vessels that connect your arteries and your veins. Their thin walls allow oxygen and nutrients to enter your organs' cells.

_____

you get them when the smallest veins or capillaries break and blood leaks out of them.

_____

...take dirty blood back to your heart. They become larger and larger as they get closer to it.

_____

...is located slightly to the left of your chest, under your ribs and between your lungs.

_____

is a muscle that divides the left and right chambers

Capillaries	Arteries	The Heart
Bruises	The Septum	Veins
