# Fraction Review 2

You are encouraged to use a calculator and scrap paper.

If you can't remember how to do something, look back in the Fraction Review virtual notebook or study guide.

1. Simplify: $\frac{12}{20}$ = —

2. Write $\frac{9}{4}$ as a mixed number. Answer: —

3. Write $2\frac{3}{4}$ as an improper fraction. Answer: —

4. Add. (Remember to change to like fractions first!)

$$2\frac{3}{8} = \text{—}$$
$$+\ 3\frac{1}{4} = \text{—}$$
$$\text{—}$$

5. Subtract.

$$7\frac{1}{5} = \text{—}$$
$$-\ 3\frac{2}{5} = \text{—}$$
$$\text{—}$$

6. Estimate by rounding to benchmark fractions (0, ½ , 1).

$\frac{7}{8} + \frac{4}{9} \approx$ ____ + ____ ≈ _____
