

Cellular energy reproduction and photosynthesis

1. Where does respiration take place ?
2. what are the reactants of respiration ?
3. Where does photosynthesis take place ?
4. What are the reactants of photosynthesis ?
5. What is the function of photosynthesis ?
6. What are the two products of photosynthesis and ?
7. What is the first step of cellular respiration ?
8. What is the goal of photosynthesis ?

9. What major process occurs in plants that provides us with glucose and oxygen ?

10. Where do plants get most of their energy ?
