- A.** Though they are becoming more and more popular, electronic books still present a variety of technological problems that need to be solved. Reading e-books can create eye strain because it is more difficult to read words on a computer screen than on a page. When reading on paper, light reflects off the page and into your eyes naturally, however, with computer screens, the device projects light into your eyes, causing headaches and possible long-term damage to your eyesight.
- B.** As it stands, you can read e-books on a computer, an e-reader and even some mobile phones. However, with more companies entering the market, it becomes difficult to keep track of which e-books each device is capable of using. Some devices use files that are incompatible with other devices, restricting your library to only a few devices. With constant innovations in computer sciences, it can happen that the file type used by most e-books may become completely outdated in the future.
- C.** E-books are just another file on a hard drive, and they often depend on the Internet to transfer from one location to another. A virus may invade your computer or you might accidentally damage your e-reader or hard drive. So just in a few moments you can lose your entire book collection. Moreover, third parties can monitor or even hack your files, and you can end up with a different file than you expected.
- D.** Many titles that are available in traditional print books are not yet available in an electronic book format. Many mainstream best sellers are available in electronic format, but if you tend to read even some more exotic titles or academic literature, you will not be able to find much suitable material in e-book format at present.
- E.** But of course, electronic books offer a range of conveniences, which will continue to expand as the technology develops. You can shop for e-books and receive them almost immediately, any time of the day or night. In addition, electronic books provide the convenience of having a lot of books available at any given time, without the trouble of having to transport them. This is particularly advantageous when traveling: rather than carrying a suitcase full of books, you can carry all the titles on a single device.
- F.** Electronic books save trees. By downloading an electronic book rather than buying a hard copy of a book, you eliminate the need to print on paper. Even recycled paper uses more resources than an electronic book. In addition, electronic books save the energy and resources that it takes to print paper books, as well as the fuel that is required to deliver them.

HEALTH TIPS FOR TRAVELLERS

Travel is fun. Travel is exciting. But it's not fun or exciting if you get ill. You may think: 'Not me. I won't fall ill on my holiday!' But, for many people, that is what happens.

Of course, you do not want to spend your holiday ill in bed. If you have heart trouble, you don't want to make it worse. So, what can you do to stay in good health? There are three things you should remember when you travel: relax, sleep and eat well.

A holiday is supposed to be a time for relaxing. But to our regret very often it is not. Think about what you do when you are a tourist. There are so many places to visit: museums, shops, parks and churches. You may spend most days walking around these places. This can be very tiring. Your feet

may hurt. You've got a terrible headache after a few hours. If this is the way you feel, you should take a rest. Do not ask your body to do too much. A tired body means a weak body. And a weak body gets ill easily. So, sit down for a few hours in a nice spot. In good weather, look for a quiet park bench. Or you can stop at a cafe. You can learn a lot by watching people while you rest.

You should not forget about sleeping. If you want to stay healthy you need to get a good night's rest. You may have trouble sleeping at night when you travel. Your hotel room may be noisy or the bed may be uncomfortable. If this is true, don't hesitate to change rooms or hotels. Or you may not get enough sleep for another reason. In many cities the nightlife can be very exciting. You may want to stay out late at night. In this case you should plan to sleep for an hour during the day. That extra hour can make a big difference.

Finally, if you want to stay in good shape, you must eat well. That means eating the right kinds of food. Your body needs fresh fruit and vegetables and some meat, milk or cheese. No doubt when you are in a new country, you will wish to try new food. But you need to be careful about how much you eat. Try to avoid eating lots of rich food.

So, remember this: if you want to enjoy your holiday, take good care of yourself. Give your body some rest. Get enough sleep and eat good, healthy food.
