Time to make changes

We all know that environmental problems are getting worse and we need to solve them or 1 planet will be in big trouble in the future. But what can we do? Can individual people make a difference? Or 2 we leave it to governments and politicians?

There are 3 lot of ways we can help.4. instance, we can recycle and save water and electricity. However, one of 5. most important things to do is to find different ways of getting power. We can get power 6 the sun and the sea as well as the wind. the trouble is that local people, 7 don't want to look at ugly wind farms or solar panels, often object to the plans. Because of this, we don't have enough alternative sources of power.

Perhaps soon people 8 learn that our way of life will need to change. After all, 9 we do something now, we won't have any light or power in a few decades' time, will we?
