Number 11-14 refer to the following text

How to Make Ice Cream

Materials: 2 cups milk or cream 2 tablespoons sugar 1 teaspoon Vanilla extract Several cups of Ice 1 cup salt		Supplies : Tub or large coffee can to hold salt and ice Glass bowl or small coffee can Electric mixer or whisk Ice cream scoop Storage container for freezer
Steps: First, set up the cooling apparatus. Stir ice and salt in the larger container. Then, combine the ingredients. Mix together the milk, sugar, and vanilla in the glass bowl. After that, set this bowl in the tub filled with ice and rock salt, making sure that the salt water does not spill into the bowl. Next, mix the ice cream. Mix the ingredients in the small container vigorously. The salty ice mixture will make the mixture cool down until it turns into ice cream. It should take about 10 to 15 minutes to stir the ice cream using either method. Stir it until it is free from ice crystals and in the right consistency. At last, keep it in the storage and serve it. ice cream is ready. (https://www.kuliahbahasainggris.com) From : Sugar spun run : Ice cream cona cup cakes
