LIGTH DETECTIVES – EXPOSITORY TEXT

Read the following text and answer the questions about it.

Shipwreck Located Below Lake Ontario

Jim Kennard searched for the British warship *HMS Ontario* for 35 years. In 2008, he teamed up with Dan Scoville. The two men used sonar, or sound, technology to find the shipwreck in Lake Ontario. But underwater divers could not reach it. The ship lay 500 feet below the surface. The men used an underwater remotely operated vehicle (ROV) that Scoville developed. The ROV has bright lighting and cameras that take images of shipwrecks. The images showed a large sailing ship. Finally, Kennard had found the *HMS Ontario*.

The *HMS Ontario* was 24.5 meters long (over 80 feet) with masts almost as tall as the length of the ship.

1. Name two characteristics of Expository Text that this text has.

2. What does the title tell you about the text?

3. The information in this text is organized in order of events. How does that help you understand the text?

4. How does the illustration help you understand the text?
