

# Guided Practice

Divide. Use multiplication to check.

When you divide a number by 6, can the remainder be 6? Explain.

$$\begin{array}{r} 1 \square R \square \\ 2 \overline{) 27} \\ \underline{\square} \\ \square 7 \\ \underline{\square} \\ \square \end{array}$$

$$\begin{array}{r} \square \square R \square \\ 5 \overline{) 59} \\ \underline{\square} \\ \square 9 \\ \underline{\square} \\ \square \end{array}$$

Check:  $\square \times 2 = \square$

$$\square + \square = \square$$

Check:  $\square \times 5 = \square$

$$\square + \square = \square$$
